Allowable Subject Matter

2. Claims 1-22 and 54-59 allowed.

3. The following is an examiner's statement of reasons for allowance:

As to Claim 1,

The primary reason for the allowance of claim 1 is the inclusion of the length being parallel to the polishing surface and longer than the width, and at least one of the

one or more protrusions and the core having a common length along an axis of the length of the core. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

As to Claim 12,

The primary reason for the allowance of claim 12 is the inclusion of the length being orthogonal to the first axis and longer than the width, and at least one of the one or more protrusions and the core having a common length along an axis of the length of the core. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

As to Claim 58,

The primary reason for the allowance of claim 58 is the inclusion of the core having a length along the first axis and a width along the second axis, the length being longer than the width. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.
